

360

We Survey. We Install. We Monitor.

The PID 360 is the market leader in temporary site security. This instant deployment security solution deters and detects intruders on your site, and successfully protects projects in a range of sectors, including:

Construction
Civil engineering
Utilities

Vacant properties
Retail

Why is PID 360 the right solution for you?

- Completely wireless solution with 360-degree visual coverage, and 110 decibel audio warning.
- Quick and easy to install by our engineers, and provides immediate security that is cost effective versus other solutions.
- PID 360 activations are monitored by our SIA licensed operatives in our fully accredited Alarm Receiving Centre (ARC).
- Our security experts will survey your site to provide you with a detailed risk analysis and the appropriate mitigation strategy.

ARC monitoring

At DeterTech, we understand the importance of timely and correct escalations in relation to incidents on your sites. That's why all of our PID 360s are securely monitored in our own UK BSEN50518 accredited Alarm Receiving Centre (ARC) 24/7/365.

As each PID 360 unit is uniquely identifiable, in the event of an activation, our trained ARC monitors are notified within seconds and can view video data instantly, while referencing the camera's location on your site.

This enables us to escalate suspicious activations quickly and effectively, to a pre-agreed list of keyholders or to a mobile security response, ensuring the most appropriate escalation to any incidents on your sites.

SiteSecurity

360

Key features.

Housing

The PID 360 has durable, armoured housing with a built-in GPS receiver.

Intruder Detection

The PID 360 has 12 motion sensors to ensure all movement is detected.

Tamper Detection

Integrated tamper detection that triggers alerts if a PID 360 is moved or knocked over.

Masking Detection

If a face of the PID 360 has been covered, an alert will be sent to our Alarm Receiving Centre (ARC) for analysis and action.

Power Management

Battery powered, with up to four years of charge. PID 360s can be placed in any location without the need for an external power supply.

Sounders

The PID 360 plays a range of audio and verbal alerts when the device is triggered.

Cameras

Cameras in each face capture short video clips for review by our highly experienced ARC operatives.

Illumination

Intrusions trigger super bright (50 watt LEDs) white lights on each face, illuminating the intruder for the cameras and acting as an effective deterrent.

Communications

The PID 360 has multiple built-in communication systems to ensure any activations are almost instantly transmitted to our ARC.
